REASON FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: allowance of claims 1-23 is indicated because the prior art of record does not show or suggest the combination of rotating shaft inserted into the rotor that rotates with the rotor, the rotating shaft extending from both ends of the rotor; and a bearing insert in the through hole of the support unit to rotatably hold the rotating shaft passing through the bearing, a front part of the bearing extending outwardly from the through hole of the support unit by a predetermined length to rotate both ends of the rotating shaft on a fixed axis as recited in claims 1, 10 and 15.

NOTE: According to Applicant argument, the Examiner is reconsidered that the reference Nutter (US 5,287,030) discloses a rotating shaft (24) holds by two bearings (32) on each side of a stator assembly (11). Nutter fails to disclose the rotating shaft support by a single bearing, such that a front part of the bearing extending outwardly from the through hole of the support unit by a predetermined length to rotate both ends of the rotating shaft on a fixed axis. Therefore, claims 1-23 are overcome Nutter's reference.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
